

AUTOMATIC TRANSPORT LOCK

THE SOLUTION FOR THE SAFE TRANSPORT OF YOUR INJECTION MOULDS

Transport position

The automatic transport safety device **R1025/1026** prevents the unintentional opening during mounting and dismounting of the injection mould as well as during the transport.

Production position

This safety system allows shorter set-up- or changeover times and guarantees maximum safety by means of the automotive mechanical locking of the two mould halves.

YOUR ADVANTAGES:

- ✓ Automatic locking
- ✓ Absolutely reliable/safe to operate
- ✓ Simple and robust design
- ✓ Short set-up- and changeover times
